

ADVANCED AUSSIE WILDLIFE COURSE

Following on from the Aussie Wildlife Course comes the new Advanced Course, presented by Currumbin Wildlife Sanctuary's veterinarians and hospital staff.

Using the Currumbin Wildlife Hospital facilities, the advanced course will explore the unique anatomy and physiology of Australia's wildlife, and how it relates to caring for wildlife and for rereleasing back into their natural habitat.

Common diseases and injuries of each taxon will be explained using practical lessons and case studies at Currumbin Wildlife Hospital. Simple life saving techniques will be covered to help you restore the lives of our native fauna.

This course is suitable for Aussie Wildlife Course graduates who want to further develop their practical wildlife care skills and expand their knowledge. Special consideration may be given to participants that have extensive industry knowledge.

To enable you to skip the Aussie Wildlife Course and move straight on to the Advanced Course, it's important you have experience or knowledge on wildlife. You will be required to provide evidence of your prior experience e.g. certificate, employment letter or wildlife carer's ID Card.

CURRENT COURSE

DATES:

4 week Course:
- 7th November 2019

COURSE PRICE:

4 week Course:
- \$350 per person
