

WINDOW DECALS

One of the main causes of injury to our native bird species are window strikes. Sadly, it is the largest cause for animals being admitted to Currumbin Wildlife Hospital each year.

A simple way to lessen the number of strikes is to decorate your windows with a decal of some sort. There are many different ways to make decals:

- ✂ Buying a pre-made kit
- ✂ Printing colouring sheets onto clear film and then colouring in
- ✂ Using window paint/kits

The images deter birds from striking the window/s, plus it is a great creative task and it is a lot of fun!
